

Toilet Pods

Plug-and-Play Efficiency & Superior Sanitary Engineering

Key Features

Fully Pre-Fitted: Delivered to the site complete with wall tiles, floor finishes, sanitary ware, mirrors, and accessories already installed.

Rapid On-Site Integration: Designed for "single-point connection" to water, waste, and electrical services, reducing site work by up to 80%.

Guaranteed Leak-Proof: Built with a monolithic waterproof base tray to eliminate the common risks of floor leaks in multi-storey buildings.

Precision Quality Control: Manufactured in a factory environment where every unit undergoes a 100% water pressure and drainage test.

Custom Interior Design: Available in various finish grades, from standard industrial durability to premium luxury hotel aesthetics.

Technical Specifications

| Parameter | Details |
|---------------|---|
| Structure | Steel frame or GRP (Glass Reinforced Polyester) |
| Wall/Ceiling | Moisture-resistant fiber cement or sandwich panels |
| Floor Base | Non-slip ceramic tiles on a waterproof composite tray |
| Dimensions | Custom (Standard: 1.6m x 2.2m) |
| Pipework | Pre-installed PPR or PEX piping (pressure tested) |
| Electrical | IP65 rated lighting and ventilation (pre-wired) |
| Sanitary Ware | Ceramic WC, Washbasin, and Chrome mixers |

Benefits

Reduced Construction Time: While the building frame is being built, the pods are manufactured simultaneously, allowing for immediate installation.

Zero Trade Coordination: Eliminates the need to coordinate plumbers, tilers, electricians, and painters in a small, cramped space.

Waste Reduction: Factory manufacturing eliminates on-site tile breakage and material off-cuts.

Enhanced Hygiene: Smooth joints and high-quality finishes make the units easy to clean and maintain in high-traffic environments.

Factory Address: Kilifi, Kenya
Tel: +254 72 495 1377

Applications

Hotels & Resorts: Ideal for ensuring consistent quality across hundreds of guest rooms.

Student Housing & Hostels: Durable, standardized units for high-density living.

Hospitals & Clinics: Easy-to-sanitize environments with specialized medical-grade fixtures.

Residential Apartments: Speed up the completion of luxury or affordable housing developments.

Why Choose WEB Housing Toilet Pods?

Turnkey Delivery: We handle everything from the initial floor plan design to the final placement on your building slab.

Kilifi-Based Manufacturing: Local production in Kenya means lower transport costs and faster technical support compared to imports.

Rigorous Testing: Every pod is certified leak-free and electrically safe before it leaves our facility.
